**PROGUTTER**

**ProGutter**

**[www.progutter.co.uk](http://www.progutter.co.uk)**

**Finding good quality tools and products that help me whilst carrying out my craft, make all the difference, they can even save me time and money. Some also make the job safer & easier. Which when your responsible for every penny you invest in tools it's a big plus for me.**

**In summer 2012 I reviewed a great tool called LadderLimb, [www.ladderlimb.net](http://www.ladderlimb.net) this is now a global success. And is used on all my jobs now where "a third hand" is needed when working up a ladder, it's time to share another great find: **ProGutter**.**

**LadderLimb & ProGutter work really well together one compliments the other.**

**When carrying out exterior decorating I always make a point of cleaning the gutters, both inside and out.**

**I can't remember the last time I painted metal ones but I do remember coating the insides with black bitumen, not a job I loved to do...**

**Mostly nowadays gutters are plastic and come in many styles and shapes. Standard black guttering gets a good wash down with KrudKutter then a rinse with warm clean water, but I clean the white plastic ones on the outside with MultiTask rinsing as above, I clean the inside of debris using ProGutter, this in itself can prove a time consuming task and very messy and like any work on ladders, dangerous.**

**I have found that when using ProGutter not only is it safer, it's much much more easier, because the debris is in effect effortlessly drawn towards me, I no longer have to stretch.**

**Using the specific ProGutter attachment that matches the gutter profile connected to a telescopic roller pole I am moving the ladder less so it's also faster, In fact, I can now clean the whole side of most houses from one ladder position.**

**Depending on the volume of debris in the gutter clean a meter at a time, follow sensible Health and safety practices at all times, as well as common sense.**

**Gutter cleaning just got so much easier!**

**Clearing gutters that are hard to reach, say over a garage, or conservatory, or even a porch is now a breeze.**

**ProGutter attachments are manufactured in the UK using high performance plastic composite, are lightweight, durable and strong, and made for the professional tradesperson or serious DIYer, and built to last.**

**Four universal attachments each weighing approx 50 grams, have a low profile design to enable easier access if roof tiles are low, available separately or in a set of four, the box set is the best buy as it comes in a very smart storage box with foam cut outs for each design.**

**There is nothing worse, when your looking for a tool or product in your van, and it's just lost amongst your tool kit.**

**They are all in one easy to find place, stored away neatly until your next job!**

**Ogee, Small Half Round, Half Round, Square Line, attachments are manufactured to be used in the matching gutter profiles. This allows more debris to be collected in a single pass, all attachments are designed so that they don't hit or snag on the brackets/securing clips.**

**For deep valley gutter cleaning, ProGutter recommend using the half round attachment.**

**Using an Acme thread in its construction allows for a much easier connection to most telescopic extension poles.**

**ProGutter can also supply 3m & 5m steel telescopic extension poles.**

**An angled adapter is also available to enable gutter cleaning whilst standing on the floor, brilliant on bungalows, conservatories, porches and garages.**

**I would not recommend clearing debris from gutter on a house from the floor as this could prove very dangerous.**

**ProGutter is must have tool for any professional trade person or fit and able DIYer**

### **Features**

- Up to 5m gutter cleaning possible from one position
- Attach to either Left or right hand side of attachment

- Fits Unger poles & most telescopic extension poles
- Lightweight only 50 grams approx
- 3m & 5m telescopic extension poles available
- Single attachments

## **Benefits**

- Acme thread
- Four different attachments available
- Made of strong high performance plastic composite
- Angled adaptor
- Use in the following gutter profiles, Half Round, Square Line, Ogee, Small Half Round
- Free storage box when purchasing a box of set four
